## About KoçSistem

KoçSistem, a member of the Koç Group of Companies and a long-established and leading information technology company in Turkey, was founded in 1945. By idealizing technology for almost 70 years, KoçSistem offers companies and the business world efficiency and a competitive edge. KoçSistem provides specialized technological solutions to its customers through its vision, modes of operation and the value it attaches to its stakeholders. KoçSistem continues to be the leader in its sector with its vision of being a pioneering force and by creating value for our country.

Playing a leading role in the digital transformation of companies, KoçSistem offers a wide range of products and services in areas such as the Internet of Things, Big Data & Analytics, Security, Corporate Cloud, Corporate Mobility, Business Solutions, and Digital Workforce RPA. As it realizes its customers' digital transformation, it invites them to experience the actual technology and the opportunities that the technology presents.

With proactive products and services offered for the business needs of customers in sectors such as banking, retail, energy, durable consumer goods, automotive, government, insurance, and many more, it digitalizes its customers' entire value chain, from the supply chain through to customer experience. KoçSistem is carrying sectors into the future with its innovative solutions and technologies.

As it meets its customers' needs in a reliable and integrated way in line with their demands and expectations, KoçSistem also develops strong strategic partnerships with leading technology producers around the world.

With its R&D projects that serve as a gateway to the global market, KoçSistem establishes sustainable relationships with major technology centers, Its R&D and Innovation Center ranks first in the software field in Turkey, its engineers offering solutions today for tomorrow's problems, helping the development of both the industry and the country, and carrying out projects that offer a competitive edge.

With its strategic perspective that sheds light on the future and creates value for its customers, its market-oriented product management approach, and technology steering R&D and innovative power, KoçSistem is ready for new transformations!

DISCOVER THE FUTURE

## WHAT CAN YOU DO?

### INCREASE PRODUCTIVITY AND EXPAND LIMITS EVERY DAY

Increase productivity by using collaboration and communication tools to prevent time loss searching for information, stay focused on your goals.

### STAY CONNECTED TO YOUR FRIENDS AND COLLEAGUES

Stay connected with your colleagues, partners and customers.

### DIGITAL WORK ENVIRONMENT

Access to all your work-related content, applications, contacts and information anytime, anywhere.

### LESSER TIME LOSS AND LOWER COSTS

Lose no time accessing information and training. With Business line Workplace, you can reach everything with a single click.

### CORPORATE MEMORY

Create corporate memory by using communities, wikies, blogs and surveys.

### ALL TOOLS AT A SINGLE POINT

Groups, news, contacts, meeting rooms, agenda, files, surveys, activities, messaging, video calling, and more await you at Workplace.

## MODULES

### ENTERPRISE SOCIAL NETWORK

**You can add files and comments to the community wall and you can like comments of others.**

- > Employees working at different companies within the same holding group can create mixed communities.
- > When adding comments, other community users can be referred to and the relevant person can be informed.

### CORPORATE MEMORY

**Wikies, Blogs, Surveys and more...**

In addition to Wikies and blogs; polls and corporate dictionary support enterprise corporate memory strategy.

### FILE SHARING

**All borders to go away.**

You can easily transfer files over mobile devices.

- > Sharing with individuals and groups
- > Manually set shared area size for each user
- > Special online shared storage for meeting rooms
- > Online file storage for each user based on their quota

### INSTANT MESSAGING AND VIDEO CONFERENCING

**No more using public applications for in-house communication and cooperation...**

- > You can safely share your text and image messages using your mobile devices.
- > You can make high quality video and conference calls and organize in-house training over your existing mobile devices without paying any prepaid fees.

### TASKS & PROJECTS

**Tasks and projects in one place.**

You can make task management easier by defining and assigning tasks, and you can always communicate with the project teams.

### MEETING MANAGEMENT

**More efficient meetings.**

- > Beacon supported meeting room occupancy control
- > Active participant management
- > Reservations for meeting rooms that suit your needs
- > Order refreshments through the application

### ADMINISTRATOR DASHBOARD

**A Centralized management opportunity.**

Administrator dashboard provides central management of users, shared contents, announcements and enables administrators to see statistics and reports.

### CORPORATE APPLICATIONS AND HR INTEGRATION

**Easier and faster.**

Businessline Workplace as a container platform, includes many tools those corporates need and also allows corporates to add enterprise platform and applications to applications menu.
